#### **DETAILED ACTION**

## Claim Objections

Claim 4 is objected to by the examiner because it claims visual displays in the form of a compact disc.

While examiner understands what applicant is intending to claim, the language is not explicitly clear regarding whether applicant is claiming visual data *encoded* on a compact disc, or whether the compact disc *itself* is the visual data. The claim should be amended to clearly claim the visual data as encoded on the CD to remove this ambiguity.

Claims 1, 10, and 16 are objected to by the examiner because the claims do not contain a preamble providing a general description of the purpose of the method. Examiner recommends rewording the claim introductions to read "a teaching method for teaching an individual to speak correctly *comprising the steps of..."*. The use of the transitional phrase "comprising the steps of" clearly defines where the preamble ends and the claim limitations begin. For guidance on claim formation see 37 CFR 1.75 and MPEP 608.01(m).

### Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 3714

Regarding claims 1, 10, and 16, the single step claims (i.e. providing the individual with displays...), where a step recitation does not appear in combination with another recited element of steps, is subject to undue breadth rejection. In re Hyatt, 708 F .2d 712 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983). The only step in the claims covers every conceivable structure for achieving the stated property (providing the individual with displays...), and is held non-enabling for the specification discloses at most only those structures known to the inventor. Claims 2-9, 11-15, and 17-20 are rejected because of their incorporation of the above through their dependencies.

# Claim Rejections - 35 USC § 102

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kirksey et al. (US 6,273,726).

The following is a quotation of the relevant portion of 35 U.S.C. 102 that forms the basis for the rejections made in this section of the office action;

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States.

Regarding claims 1-20, Kirksey discloses an audio visual language teaching method for teaching an individual to speak correctly and effectively. See col. 2: 5-19.

The method comprises providing to the individual visual displays comprising a plurality of graphical representations for guiding the individual in creating specific sounds and speech patterns [claims 1, 10, and 16]. See col. 8: 20-30.

Application/Control Number: 10/770,272

Art Unit: 3714

Kirksey further discloses wherein the visual displays are provided in written and video (e.g. electronic) form [claims 2-3, 11-12, and 17-18]. See col. 7: 8-11.

Kirskey further discloses wherein the data for the visual displays is provided on a compact disc [claim 4]. See col. 10: 30-34.

Kirksey further discloses wherein the visual display includes graphical representations of the volume, pitch, and tone that the user should use when enunciating the words [claims 5, 7, 9-10, 13, 15, 16, and 20]. See col. 8: 20-30.

Kirksey further discloses wherein the visual displays provided to the user include a graphical representation of pace [claims 6, 10, and 16]. See col. 5: 34-61.

Kirksey further discloses wherein the graphical dispay comprises indicating to individual when words are to be spoken with more or less melody [claims 8, 10, 14, and 19]. See col. 8: 20-30, and note that melody is merely a combination of pace, pitch, tone, and volume.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy Musselman whose telephone number is (571)272-1814. The examiner can normally be reached on Mon-Thu 6:00AM - 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pezzuto, can be reached on (571)272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
